**Bid Price Report for Standard Pay Items
January to December, 1996
BDC97T-007**

June 24, 1997

**MEMORANDUM
Baseline Document Change**

Subject: Release of Metric Version of the Bid Price Report
for Standard Pay Items, January to December, 1996

Attached is a copy of the "Bid Price Report for Standard Pay Items" covering the period January to December, 1996. This bid Price Report is the Metric Version of the English Version of the Bid Price Report which was released via a BDC memorandum dated February 21, 1997, entitled "Bid Price report for Standard Pay Items, January to December, 1996, BDC97T-001". The decimals on the quantity and unit price fields in the report were necessary to make the total price bid the same in both English and Metric Versions. There are no true Metric prices for 1996; they are converted from the English prices. This Report shall be used in the preparation of construction cost estimates using the *NJDOT Standard Specifications for Road and Bridge Construction, 1996*.

Designers are reminded that the Average Weighted Price is presented only as general information which may indicate year to year price trends for various Standard Pay Items. It should not be used exclusively in preparing construction cost estimates. Instead, the project location, size, and type of construction should be considered when choosing unit prices. Memorandum to All Design Units entitled "Construction Cost Estimates, 95075 ADU", dated October 13, 1995, or subsequent revisions, should be consulted for further direction.

WORK TYPE CLASSIFICATIONS

THE IDENTIFICATION FOR WORK CLASS IS AS FOLLOWS:

1. NEW CONSTRUCTION

New construction or major reconstruction of divided or undivided highways. Includes all major phases of construction--site preparation, earthwork, drainage, structures, paving, etc.--whether contracted separately or as a complete project. Minor items such as signing, landscaping and guiderail are included unless they are in separate specialty contracts.

2. RECONSTRUCTION, WIDENING AND DUALIZATION

The removal and replacement, rebuilding or upgrading of an existing facility, including intersections. There may be grade changes but normally the changes will not be significant. Includes all phases of construction. May include short relocations. Includes widening equivalent to one lane width or wider. Includes structures when decks are replaced on existing substructures or decks are widened and substructures extended. Includes intersection improvements when roadway area is also rebuilt.

3. WIDENING AND RESURFACING

Widening and resurfacing of existing highway facilities when the total added width is equivalent to less than one lane width in each direction and grades are not changed. Includes minor grading, extending culverts, curb and gutter, etc. Includes bridge deck widening possibly without substructure changes.

4. RESURFACING

Overlaying existing highways, and surfacing or overlaying existing shoulders with asphaltic material. Includes joint repair, minor widening with asphaltic materials, some base corrections or asphaltic base, curb and gutter replacement, and adjustments at structures, drives and street returns. Does not include extensive reconstruction, pavement replacement or construction of new pavements, excavation, utility or sewer work.

5. BRIDGE REPAIR

Repair of bridges, includes repairs to decks, curbs, rails, beams and structures. If total deck removal and replacement is required, the contract would be classified as reconstruction.

6. INTERSECTION IMPROVEMENTS

Minor construction or reconstruction of street highway intersections. Normally includes some removal, grading, drainage and paving. May include curb and sidewalk along with traffic signals installed at the intersection. If intersection pavement is to be rebuilt, the contract would be classified as reconstruction.

7. SAFETY AND TRAFFIC CONTROL

Placement or replacement of guide rail, signs, striping, lighting, traffic signals, and other safety and traffic control devices, along streets and highways, when let on a specialty contract basis. If safety and traffic control devices are included as part of a major work type, they would be included under the minor activities for that type.

8. MISCELLANEOUS

Construction activities, let on a specialty contract basis, not assignable to other work classes. Includes demolition of buildings, removal of asbestos, and railroad pavement painting.

9. UNIQUE

Construction activities of a distinctive nature which is let on a specialty contract basis. Includes wetland replacement and restoration.
